

Curriculum Vitae

Louise Rosenmayr-Templeton

Summary of Experience and Achievements

Louise Rosenmayr-Templeton is a pharmacist with over 18 years' experience in pharmaceutical product development and project management. In 2002 she set up Tower Pharma Consulting to provide information and advice to pharmaceutical/biotech companies and government agencies.

Core Competences

- Assessments of research and technology from a scientific, future applicability and commercialisation perspective in the fields of pharmaceutical product development, drug delivery and biotechnology.
- Development of strategies for the formulation of pharmaceutical products, including the application of novel drug delivery technology to difficult to formulate compounds. Provision of formulation expertise and overview to clients, particularly those managing their product development efforts virtually.
- Service provider evaluation, management of third party projects and identification of business partners and/or potential new customers in Europe.

Previous Experience

Before setting up Tower Pharma Consulting, Dr. Rosenmayr-Templeton worked in various capacities for major pharmaceutical companies such as Abbott Labs (UK and USA), the Élan Corporation (Ireland) and Boehringer Ingelheim (Austria). Her experience spans the whole spectrum of product development from managing pre-clinical research projects, to the successful scale-up and technology transfer of products to manufacturing sites, and the preparation and review of regulatory documents.

During her career she has formulated small molecules, proteins and peptides using conventional and novel delivery technology. In addition, she has provided scientific expertise on a wide variety of projects and carried out numerous assessments of research and technologies in the area of drug delivery under consideration for licensing, joint venture formation or project funding. She has also evaluated contract service providers on behalf of clients.

Education

Dr Rosenmayr-Templeton graduated from Strathclyde University in 1986 with first class honours and obtained her PhD in the field of novel drug delivery from Nottingham University. She has a postgraduate Diploma in Management Studies from Canterbury Christ Church University.

Professional Activities

Dr Rosenmayr-Templeton is a UK registered pharmacist. She is co-chair of the Young Scientist Committee of the Controlled Release Society and a member of the Drug Delivery Focus Group of the International Association for Pharmaceutical Technology (APV). She writes a regular Industry Update article for the journal, Therapeutic Delivery, and is part of the journal's Editorial Advisory Panel.
